The Business Administration program at Broome Community College is a sequence of courses in Business, Liberal Arts, and Math/Science that leads to the Associate in Science degree. The program is designed primarily to prepare the student for transfer to four-year schools although some students do seek employment immediately after graduation. The BCC Department of Business has transfer agreements with many universities which ensure graduates of full Junior status at the upper division school. Students completing the program also have the option of continuing studies at Broome Community College to receive a Bachelor's degree through the New York State Excelsior College.

The program is designed to be completed in two years by the full-time student. Students who wish to pursue part-time studies may do so. Schedules can be personalized to fit many needs including the BCC College-on-the-Weekend program of study.
